

CLAIM

I CLAIM:

A new and distinct variety of nectarine tree, substantially as illustrated and described, that is most similar to its selected pollen grandparent, 'Rose Diamond' (United States Plant Patent Number 7,421) nectarine, by producing nectarines that are nearly globose in shape and yellow in flesh color and that mature during the first week in June, but is distinguished therefrom by producing nectarines that are clingstone instead of freestone, larger in size, darker red in skin color and more acidic in flavor.
